

Envirothon Fifth Topic Treesources and Links

- [Maryland Forest Action Plan](#)
 - Maryland Forest Action Plan: Assessment (Skim first 31 pages)
 - Maryland Forest Action Plan: Strategy (Skim first 45 pages)
 - Read in depth the executive summaries for both
 - If you only have time to focus on one, focus on the Strategy document
- [Helping Your Woodland Adapt to a Changing Climate](#)
 - Focus on
 - Projected changes
 - Key Actions
 - The three “Climate change impact” and “Management options” pages
- [Climate Change Projections for Individual Tree Species- Piedmont \(Subregion 5\)](#)
- [Climate Change Projections for Individual Tree Species- Coastal Plain \(Subregion 6\)](#)
 - Good resources for potential species migration
- [Native Plants and Climate Change](#)
 - Make a note of temperature and sea level increases
- [Planting Trees in our Changing Climate](#)
 - Focuses on native trees
 - The benefits
 - Where they can be attained

Recommended Not Necessary (For those who want to learn more):

The Training of a Forester by Gifford Pinchot

A Sand County Almanac by Aldo Leopold

Silent Spring by Rachel Carson

The Nature of Oaks by Douglas W. Tallamy

How to Love a Forest by Ethan Tapper

I applaud you for investing your minimal free time into a program as beneficial as the Envirothon. Learn a lot and have fun while doing so!

If you have any further questions, Envirothon related or not, or just wish to discuss natural resource management please email me at alanna.crowley@maryland.gov and we'll have a conversation.

-Alanna Crowley
